## PROFESSIONAL DEVELOPMENT

### Urban Medical Center

Jersey City, NJ

IT Operations & Systems Manager

April 2022 – Present

- Secured IT and clinical infrastructure across 3 clinic sites: Active Directory, Windows/Linux environments, network segmentation, and 99.9% system uptime.
- Administered EMR/EHR platforms (Elation, Amazing Charts): user provisioning, role-based access controls, audit logging, and HIPAA Security Rule compliance for ePHI across all clinical workflows.
- Built Python + Playwright automation against Elation and payer APIs (UHC, Wellcare, Availity) handling PHI end-to-end well that eliminated 40 hours of weekly manual work while maintaining HIPAA minimum-necessary enforcement.
- Led HIPAA self-audit (April 2026): identified exposed OAuth credentials in development environment, rotated all secrets, and migrated to hardened secret management, closing the gap before a breach could occur.
- Engineered OAuth 2.0 integrations against Elation's FHIR-adjacent API with scope minimization, token rotation, and audit trails.
- Established incident response protocols and continuous system monitoring, zero repeat failures over 2 years across all locations.
- Trained 12+ clinical and administrative staff on EHR workflows, HIPAA protocols, and incident reporting procedures.

Medical Biller/Coder

August 2021 – April 2022

- Built data validation workflows catching claim discrepancies pre-submission, enforcing HIPAA compliance and reducing payer denial risk.
- Processed 150+ PHI records weekly with 90% discrepancy resolution rate through systematic troubleshooting and root-cause analysis.
- Analyzed denial patterns and billing data, generating compliance reports that informed coding corrections and improved clean claim rates.

### Vanity Clinic

Hoboken, NJ

Clinical IT Support Specialist

October 2018– April 2019

- Deployed and configured EHR systems for 6+ clinicians, managing go-live support and post-implementation troubleshooting while sustaining 99% uptime.
- Enforced HIPAA Security Rule safeguards: user access reviews, audit logging, and data integrity controls across clinical workstations.
- Analyzed clinical workflows and recommended EHR configuration changes that reduced documentation time by 15%.

## TECHNICAL PROJECTS

- Personal Security Research Environment
  - Operate a hardened lab with 5 MCP security servers and 30+ penetration-testing CLIs for offensive and defensive research against healthcare-adjacent targets.
  - Continuous work on threat detection, network analysis, API security testing, and secure automation pipelines.
- Healthcare API Security (Urban Medical Center)
  - Production OAuth 2.0 integrations with Elation EHR: token scope hardening, refresh handling, credential rotation, centralized secret management.
  - Payer portal automation (UHC, Wellcare, Availity) with session isolation, PHI handling controls, and failure detection.

## CERTIFICATIONS

- HIPAA Privacy & Security
- Healthcare & Billing Practices
- Cyber Crimes iQ4/CWA Industry-Recognized Credential (350 OJT Hours) Hands-on training in digital forensics, incident response, and cyber threat investigation.

## SKILLS

- Security & Compliance: HIPAA Security Rule, ePHI handling, incident response, access control, audit logging, secret management, vulnerability remediation, OAuth 2.0 hardening, minimum-necessary enforcement.
- Networking & Infrastructure: Active Directory, Windows/Linux administration, network troubleshooting, system monitoring, VLAN concepts, segmentation principles, endpoint management.
- Automation & Development: Python, Playwright, SQL, REST/FHIR APIs, automated reporting, data validation pipelines.
- Healthcare Systems: Elation EHR, Amazing Charts, FHIR, HL7 concepts, connected medical device awareness (clinical rotations).
- Tools: Google Workspace, Microsoft 365, ticketing systems, CMDB, MCP servers.

## EDUCATION

### Saint Peter's University (Graduated)

Jersey City, NJ

Bachelor of Science in Computer Science

### International College of Health Sciences (ICHS)

Hollywood, FL

### Traditional BSN Program (In Progress)

- Clinical rotations across acute care, critical care, and ambulatory settings, bedside experience with connected devices: infusion pumps, patient monitors, ventilators, telemetry systems, PACS workstations.
